

Публикации официального оппонента Воловика Григория Ефимовича,
доктора физ.-мат. наук, главного научного сотрудника сектора гравитации и космологии,
Институт теоретической физики имени Л.Д. Ландау РАН

1. Kopnin force and chiral anomaly
G.E. Volovik (Aalto U. & Landau Inst.).
Pis'ma ZhETF 98 (2013) 848-852, JETP Lett. 98 (2014) 753-757.
2. G.E. Volovik, Flat band in topological matter: Possible route to room-temperature superconductivity, J. Supercond. Novel Magnetism, **26**, 2887-2890 (2013).
340, 352-368 (2014).
3. M.I. Katsnelson and G.E. Volovik, Topological matter: graphene and superfluid ^3He , J. Low Temp. Phys. **175**, 655-666 (2014).
4. P. Esquinazi, T.T. Heikkila, Yu.V. Lysogorskiy, D.A. Tayurskii, G.E. Volovik, On the superconductivity of graphite interfaces, Письма ЖЭТФ **100**, 374-378 (2014).
5. G.E. Volovik, From Standard Model of particle physics to room-temperature superconductivity, Nobel Symposium proceedings, Phys. Scr. **T164**, 014014 (2015).
6. T.T. Heikkila and G.E. Volovik, Nexus and Dirac lines in topological materials, New J. Phys. **17**, 093019 (2015).
7. On the chiral magnetic effect in Weyl superfluid $^{33}\text{He-A}$
G.E. Volovik (Aalto U. & Landau Inst.). JETP Lett. 105 (2017) no.1, 34-37
8. Chiral vortical effect generated by chiral anomaly in vortex-skyrmions
G.E. Volovik (Aalto U. & Landau Inst.). JETP Lett. 105 (2017) no.5, 303-306
